### Introductory note

#### This introductory note does not form a part of the notice

The following notice gives notice of the variation of an environmental permit.

The permit extends the boundary of the site as shown in the revised site drawing at the end of this notice. The operator still meets the criteria for Standard Rules set SR2008 No. 3 household, commercial and industrial waste transfer station with treatment. This variation also revises the volume limit such that the Standard Rules now has a limit of 75kte.

The schedules specify the changes made to the original permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
